WORK EXPERIENCE

Newell Brands (Rubbermaid Commercial)

May 2023 - Current

Data Analyst

Charlotte, NC

- Designed a statistical opportunity model that ranked sales gaps and cross selling opportunities by sales rep and region, helping uncover millions of dollars in potential revenue.
- Built a custom SQL database by ingesting third party scraped data and developed Python based logic to identify pricing violations using internal business rules. Recognized as a best in company solution.
- Developed custom Python logic to standardize thousands of addresses and customer names across multiple distributors, creating cleaner and more accurate reporting.
- Led AI initiatives by helping develop and launch multiple intelligent agents supporting Brand, Product, Sales, and Pricing teams.
- Transformed a manual report into an automated Power BI dashboard distributed to 100+ users daily. Combined multiple data sources and added custom drill down tools for KPI analysis.
- Automated promotional planning workflows using custom Power Automate flows.

Lids

June 2022 – May 2023

Business Analyst - BI and Automation

Indianapolis, IN

- Saved 10+ hours per week by building an automated batch upload system to transfer daily data from Azure to a legacy database.
- Streamlined the allocation process by optimizing an automated model that distributes 500,000 + units weekly across 1,000 stores based on forecasted demand, sales and trends.
- Improved reporting process and tools for buying, allocation, and planning teams, allowing faster and more detailed data driven decision making.

Lids

June 2021– August 2021

Merchandising Analytics Intern

Indianapolis, IN

- Won an intern case competition by developing and launching the private label brand *Explore by Lids*, which was rolled out nationwide and generated over \$500k in sales.

EDUCATION

University of North Carolina

Expected May 2027

Master of Applied Data Science (In Progress)

Chapel Hill, NC

- Advanced coursework in linear algebra, deep learning and machine learning with emphasis on applying concepts to real world data science problems.

Purdue University

May 2022

BS Business Analytics and Information Systems

West Lafayette, IN

- Vice President of Purdue Club Baseball, managing scheduling and roster decisions for the team.

SKILLS

Programming: Python (pandas, NumPy, scikit-learn, TensorFlow), SQL, R (tidyverse, ggplot2)

Machine Learning: Supervised & Unsupervised Learning, Statistical Modeling, Deep Learning

Data Engineering & BI: ETL Pipelines, Power Automate, Power BI (DAX, dashboards)

Communication: Data storytelling, cross functional collaboration, mentorship
