PROFESSIONAL SUMMARY

Skilled enough to find insights in your data, personable enough to present them in front of leadership. 5+ years of building data solutions with SQL, Python, R, and Power BI, from enterprise data models and automation to generative AI. I turn complex problems into solutions people can actually use.

WORK EXPERIENCE

Senior Associate, Sales Effect & Analytics

June 2026 – Present

Newell Brands

Charlotte, NC

- Developed generative AI agents that query internal data models, saving 30 minutes per request by giving non-technical users direct access to data insights without submitting ad hoc requests.
- Built custom mobile applications used by Sales to conduct facility audits and generate new lead opportunities.

Business Data Analyst, Analytics & Communication

May 2023 – June 2026

Newell Brands

Charlotte, NC

- Architected a data pipeline that ingested web scraped pricing data into SQL and used Python logic to alert internal teams of pricing violations. Recognized as a best in company solution.
- Saved \$100,000+ annually by replacing an outsourced Finance reporting process with a SQL and Python automation that tracks customer rebates using custom matching logic.
- Designed an enterprise grade Power BI semantic model integrating Sales, Forecast, and Budget data, used by 70 users and trusted as the company's single source of truth for tracking over \$1B in annual sales.
- Built a product recommendation model using Python and SQL to identify cross selling opportunities from end user purchase data, uncovering over \$1M in potential revenue.

Business Analyst, BI & Automation

June 2022 – May 2023

Lids (Hat World Inc.)

Indianapolis, IN

- Engineered an Azure to SQL data pipeline that automated daily data transfers and saved 10 hours per week.
- Optimized allocation models that distributed 500,000 units weekly across 1,000 stores based on forecasted demand, sales, and trends.

Merchandising Analytics Intern

June 2021 – August 2021

Lids (Hat World Inc.)

Indianapolis, IN

- Won a summer intern competition by developing and pitching Explore by Lids to senior executives. The private label brand was later rolled out to stores nationwide and generated over \$600,000 in sales.

TECHNICAL SKILLS

Tools: Python, SQL, R, Power BI, Copilot Studio, Azure, Git/GitHub, Power Apps

Skills: Data Modeling, Machine Learning, Statistical Modeling, Data Pipelines, ETL, Data Visualization

EDUCATION

University of North Carolina at Chapel Hill

Chapel Hill, NC

Master of Applied Data Science.

May 2027 (expected)

Relevant Coursework: Machine Learning, Deep Learning, AI in the Cloud, Mathematics for Data Science

Purdue University

West Lafayette, IN

Bachelor of Science in Analytics and Information Systems.

May 2022
